#### A SECURE AND PRIVATE EMAIL

Mohammad Salman Nadeem Information security analyst – Mailfence 31 March 2017

# Why did email encryption never take off?

- Why email data needs to be protected?
- Email encryption was not always secure!
- What is the solution then?
  - End-to-end encryption!
- "True" End-to-end encryption is complicated
  - it should be made easy-to-use

# **EMAIL ENCRYPTION SHOULD BE MADE EASY**

WEB BASED	Easy & secure access on all devices	
PRIVATE KEY MANAGEMENT	<ul> <li>Key generation, export, modify and delete their key pair</li> <li>Generate revocation certificates or perform direct revocation</li> <li>Import their existing key via file or in-line text</li> <li>Manage multiple keypairs</li> </ul>	
PUBLIC KEY SERVER INTEGRATION	<ul> <li>Seamless integration of key servers in our interface.</li> <li>Users can publish, search, import, update their public keys</li> <li>Update public key validation status</li> </ul>	
INTEGRATED ACCOUNT  KEYSTORE	<ul> <li>Integrated key-store unique to every account</li> <li>For key-generation / import &amp; advance key management</li> <li>Supports multiple personal keypair management</li> <li>Completely independent from any third-party plugin/app</li> </ul>	

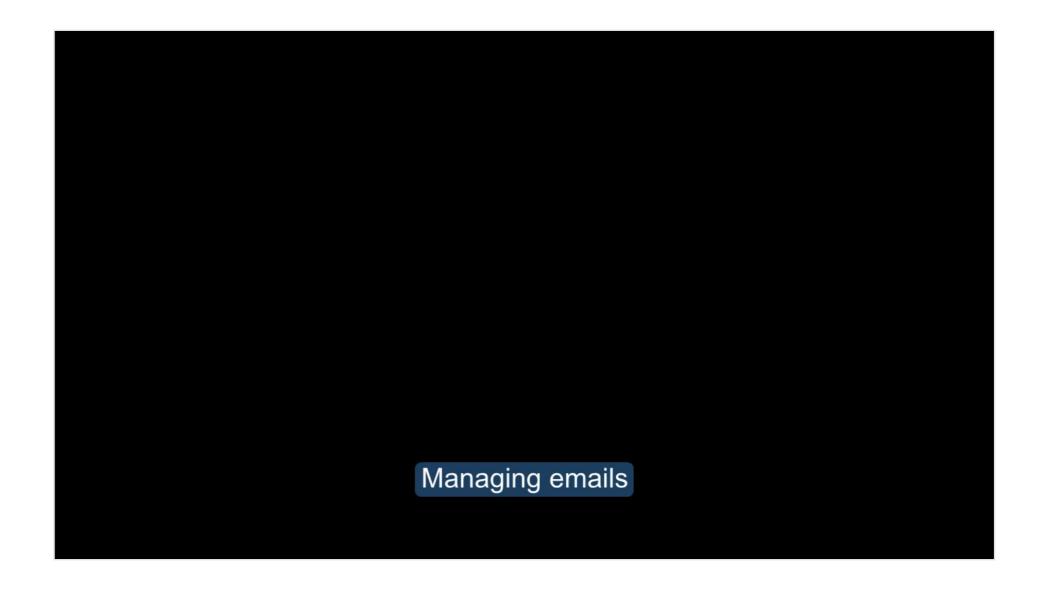

# **EMAIL ENCRYPTION SHOULD BE SECURE**

USE OF STANDARDS	<ul> <li>Based on OpenPGP standard RFC-4880</li> <li>Supports both inline and PGP/MIME formats</li> <li>Completely inter-operable with any other OpenPGP compliant solution</li> <li>All crypto operations happen on the client side (browser)</li> <li>Key-generation 4096bit RSA gets generated on the browser, THEN encrypted with the user's passphrase and THEN stored on the server</li> <li>Server holds a ZERO KNOWLEDGE framework for user keypairs</li> </ul>	
TRUE END-TO-END ENCRYPTION		
SUPPORT DIGITAL SIGNATURES	<ul> <li>Sign, Sign + encrypt</li> <li>Easy to understand signature validation results</li> </ul>	
USER-FRIENDLY INERFACE	<ul> <li>Crystal interface, which is easy-to-use</li> <li>Operation flow is as simplified as any other email</li> </ul>	

### **EMAIL ENCRYPTION: EMAIL AND MUCH MORE!**

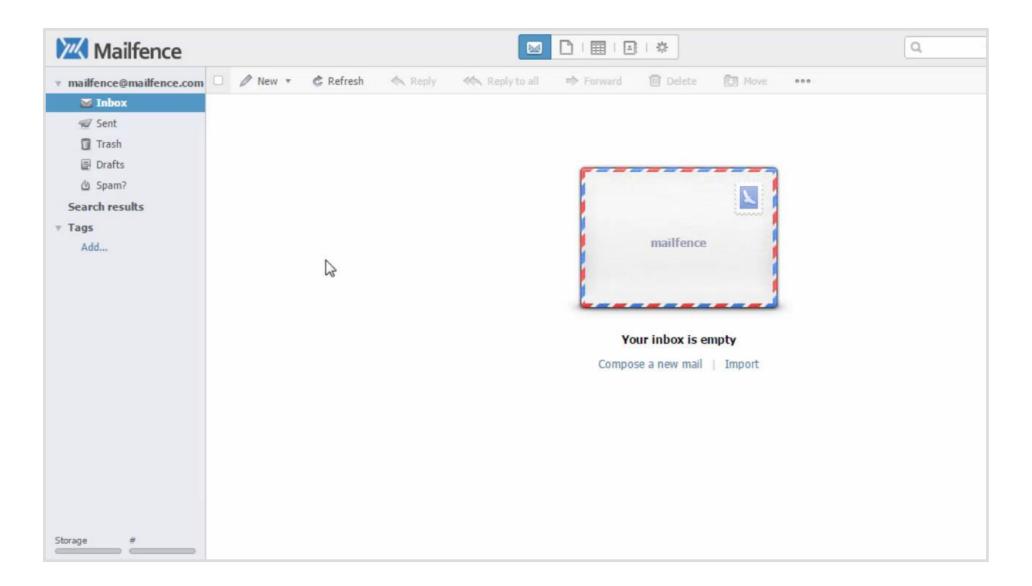

- Calendars: Shared calendar, meetings, polls.
- **Documents:**Create, edit, share documents.

- Groups:
   Manage groups to share data.
- Contacts:
  Create, manage and share contacts.

#### A UNIQUE ENCRYPTED AND PRIVATE EMAIL

• Digital Signatures: Send & receive digitally signed emails (inline & PGP/MIME).

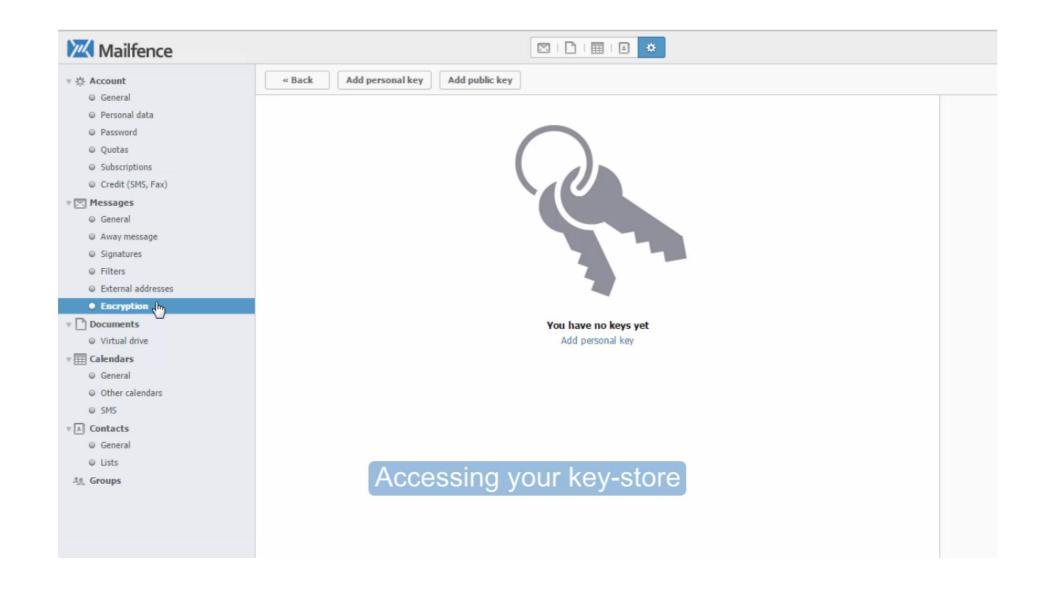

- User friendly without plugins or applets
   All is done through the browser
- E2EE:

Send & receive encrypted emails (OpenPGP based).

The private key is encrypted with passphrase (AES-256)

## WITH INTEGRATED KEY-SERVER

• Key Management: Generate, Import/Export, Modify, Revoke, Delete... your key-pair.

Key-server integration
 Queries, Publication, Revocation.

# **EMAIL ENCRYPTION: USER SHOULD BE FREE**

CONTROL OVER YOUR KEYS	<ul> <li>Users get full control over their OpenPGP keys</li> <li>No restrictions/or hidden blockages</li> </ul>
FULL REVERSIBILITY	<ul> <li>Users can export their encrypted keypair and other public keys</li> <li>Users can export their encrypted messages data</li> </ul>
NO DIGITAL ISLAND	<ul> <li>Users can send plain text to any other email address</li> <li>Users can send encrypted emails other email addresses (OpenPGP interoperability)</li> <li>Supports encryption/decryption and signing/signature validation of attachments</li> </ul>

#### WITH AN ENTERPRISE OFFERING

	standard	mobility	group
Messages	25 GB	25 GB	25 GB
<b>Documents</b> Privé + groupes	1 GB 1 GB +	1 GB 1 GB +	<b>30 GB</b> 5 GB + 25 GB
Calendriers Contacts	Limité	✓	✓
<b>Groupes</b> Membres/groupe			<b>5</b> 10
Synchro Mobile & web		✓	✓
Support Tél. & email	<b>(</b> ((	✓	✓
Voir détails		5.00 €/mois	25.00 €/mois

- Personalised version:
   Customised solution to fit specific needs.
   Look & feel adaptation
   Specific subscriptions
- API:
  Provisioning, group management,
  tool integration
- Secure authentication:
   Ldap integration, 2FA, SSO, SAML

- Administration tools:
   Web administration, Owl database operations, ...
- Dedicated hosting:
   Both private or public cloud offering
